

RENA HIGH-SPEED INKJET VERSATILE IMAGING SYSTEM

PS-1000

Thinking outside the mailbox.

- Fast – Offers print speeds up to 79 inches per second – that's nearly 400 feet per minute!
- Tough – Engineered for years of trouble-free operation in harsh conditions.
- Versatile – Can be configured to operate with almost any base, machine, or production line.
- Intelligent – Advanced material sensors, speed encoders, and universal design give it the edge.

RENA PS-1000

RENA HIGH-SPEED INKJET VERSATILE IMAGING SYSTEM

PS-1000

Ready to go. Instead of trying to rig up an old high-speed printer and configure it to your needs, the PS-1000 offers an out of the box solution. Its multi-component design makes integration a snap! Reduce your cost and down time with the system that was created for special applications.

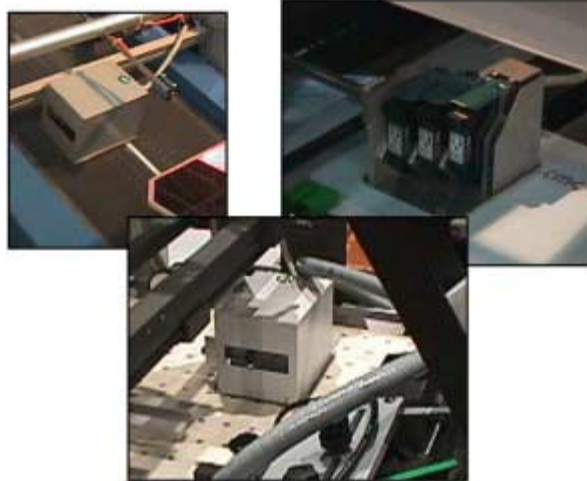

A unique concept. No other imaging system available offers the total flexibility of the PS-1000. The print heads can even be angled (see photo at right) and rotated to suit your needs.

Advanced design. The PS-1000 has high-tech material sensors that can detect different types of materials. It also has a protective print-head shield to maintain smooth, reliable performance regardless of the surroundings.

JETMate inside. Included free with every printer is our exclusive printer control software, RENA JETMate. Drag and click to design your layout - it's that easy! Print information, barcodes, graphics and TrueType fonts.

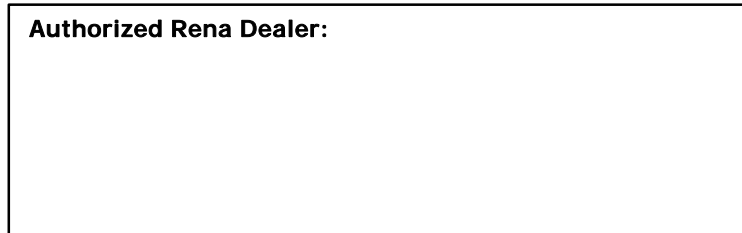

Quality built in! Building heavy-duty production equipment for seventy years, RENA products have earned their reputation for endurance.

The PS-1000 provides a quality printing solution that can be integrated with a variety of systems.
(Shown in action incorporated into several production units)
