

RENA IN-LINE INKJET ENVELOPE IMAGING SYSTEM

True production speed, true Rena quality.

- Fast – Designed for production speeds up to 30,000 postcards or 20,000 No. 10 envelopes per hour.
- Versatile – prints addresses, graphics, postal indicia, return addresses, and barcodes on material up to 1/2" thick.
- Superior Print Quality – Resolution up to 600 DPI with black or spot color cartridges.
- Tough – Rated for over 2 million addresses per month.
- Five Print Qualities – Optimize ink consumption and maximize performance on glossy material.

RENA DA-615

RENA IN-LINE INKJET ENVELOPE IMAGING SYSTEM

Engineered for production imaging.

The DA-615's unique layout and paper transport system accepts material fed from either the right or left* side. This allows it to perform with industry standard bases such as Kirk Rudy as well as stand-alone feeders, mailing machines, folders, inserters, and digital copiers.

Letter quality print and production speeds.

The DA-615 features a maximum print resolution of 600 dpi, which provides the best print quality possible. With its four stationary print heads, only the material moves, which allows the DA-615 to achieve high operating speeds.

The RENA DA-615 – shown with the AF-500 Heavy Duty Feeder, MC-1 Cabinet and the TB-356 Conveyor/Stacker.

Downloadable fonts and images.

In addition to its 13 standard internal fonts, the DA-615 accepts TrueType fonts, Hewlett Packard® LaserJet (PCL) downloadable fonts and graphics in a PCL print file format. This feature allows for crisp, fast graphic printing.

Printing Capability. With dual twin print stations, the DA-615 can print two inches of text or graphics. The print head pairs are movable, so the return address and a logo can be printed at the same time as the barcoded address – even using multiple fonts on the same piece.
