

UT-361

RENA IN-LINE TABBING SYSTEM

RENA UT-361

Fast, production tabbing at an affordable price!

- Operates in-line with most address printers, labelers and feeders for faster processing.
- Applies one or two tabs in one pass — up to 24,000 per hour; applies paper or clear film tabs.

RENA IN-LINE TABBING SYSTEM

The UT-361 saves time in the mail center by operating in-line with most address printers, labelers, folders, and feeders. By adding a UT-361 to your addressing operation, you'll get your mail out faster by addressing and tabbing in one pass.

Saves time — The unique design of the UT-361 enables single or dual tabbing in one pass, saving time and increasing productivity.

Applies paper, translucent or clear film tabs. The UT-361 applies round or square tabs and even applies clear tabs that won't interfere with mailpiece design.

RENA's UT-361 shown in-line with a RENA AF-371 Feeder and RENA TB-356 Conveyor Stacker. The UT-361 can easily process 24,000 mailing pieces per hour.

The fastest table-top, in-line system available. Tabs at speeds up to 24,000 8-1/2" x 11" tri-folded mailpieces per hour.

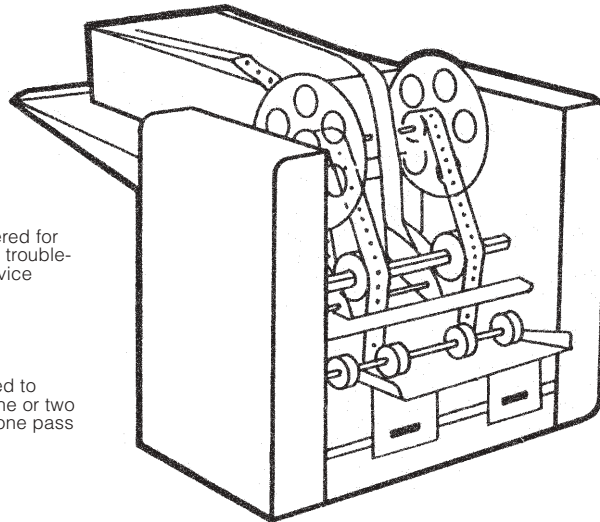

Tabs a variety of mailers. The UT-361 tabs tri-folded mailers, double post cards, booklets, newsletters, catalogs, and much more — up to 5/32" thick.

Tabbing helps qualify for lower postal rates and faster delivery. RENA's UT-361 applies tabs according to U.S. Postal Service guidelines. By tabbing your mail and following other guidelines, you can qualify for automation-compatible, discount postal rates.
