

# FriendShip® PS600

The Single Solution For Your Every Need—Around The Clock, Around The World.

---

Shipping is no longer just a part of "doing business." In fact, many companies have realized that shipping is a key to success in today's competitive business world. That's why we've created the FriendShip PS600, one of the world's most complete and advanced shipping solutions.

The FriendShip PS600 transmits package level detail (PLD) information electronically, constantly updates changing rates and services, and adapts to new technologies. Now you have the power to control every aspect of your shipping department—from labeling to tracking to coordinating worldwide intermodal delivery. With just one keystroke, the FriendShip PS600 weighs your package, identifies the best carrier rate, calculates the

shipping charge, generates a package tracking number, prints a shipping label, stores the data in a permanent database, and transmits PLD information electronically to the carrier.

Better yet, this stored information can facilitate such activities as inventory management, same day billing, and customer service inquiries. And with WinLink® 2000, our exclusive connectivity software, you can seamlessly integrate the shipping department into various business information systems. So now traffic, warehouse, order-entry, marketing, purchasing, accounting, and other departments can make smarter, better informed decisions based on the shipping information you provide.

PS600 software comes with UPS OnLine® Compatible EDI up-link advanced software module at no additional cost, and is MAC Certified for Mail Manifesting. PS600 Software is also Certified by the USPS for Delivery Confirmation.

## THE FRIENDSHIP PS600 SYSTEM

FriendShip PS600 Series Software  
(Includes basic UPS, RPS, FedEx, and USPS rates and services with Optional DHL, Emery Airborne, and customizable local courier/LTL rates and services.)
