IJ105

Pump up the volume.

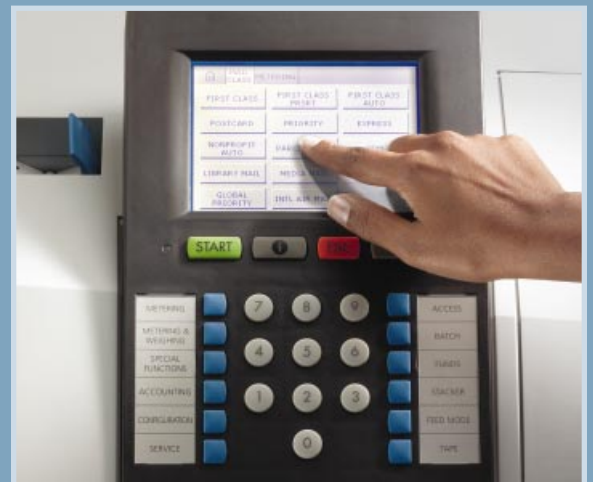

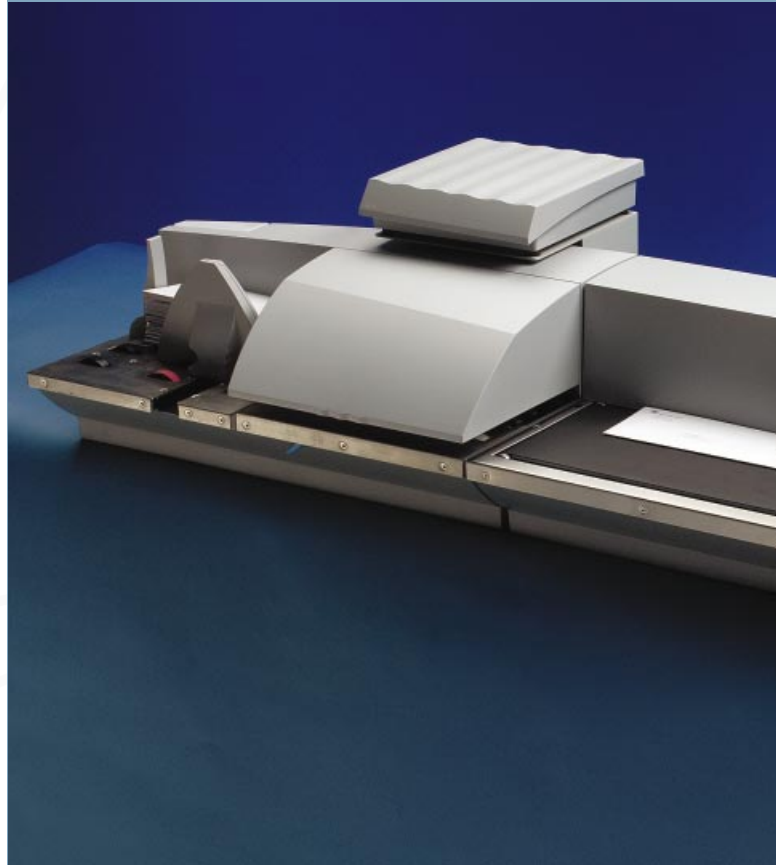

As any business moves forward, the demands placed on its mail center can increase exponentially. And, because mail volume is a constant variable cycle of highs and lows, your business requires a dependable mailing system that can absorb rush jobs with refinement and accuracy. Neopost's flagship mailing machine, the IJ105, is that kind of system.

Capable of outputting up to 217 letters per minute, the awe-inspiring performance of the IJ105 is being met with rave reviews from mail center managers everywhere. The IJ105 processes up to 120 letters per minute when the dynamic scale is activated, establishing itself at the head of its class-IJ105 is the most affordable high speed in-motion weighing system available today!

But speed is nothing without strength, and the reliable IJ105 is engineered to stand the test of time. Harnessing its momentum with a revolutionary transport system, envelopes transition from one end of the machine to the other with precision and fluidity. The meter inkjets high-resolution indicias onto envelopes or labels, eliminating the impact of a meter head. The result is extremely quiet operation with virtually no complication.

The clean lines of the IJ105 mailing system make an understated, yet impressive visual statement that culminates in the simple functionality of its touch-screen user interface. Designed with the familiar visual and tactile concepts used in desktop computer software, this intuitive control system utilizes on-screen "buttons." By touching the screen to select functions or jobs, users are guided through prompts that simplify even the most complicated mailings.

The IJ105 is a great mailing solution for companies with major mailing needs such as month-end billings or direct mail marketing programs. With its unique combination of speed, durability and ease of use, the possibilities are endless for any business that reaches its audience with mail.

Get in touch!

The IJ105's interactive touch screen eliminates scrolling through menus and puts the selection of rates and common jobs, literally, at your fingertips.

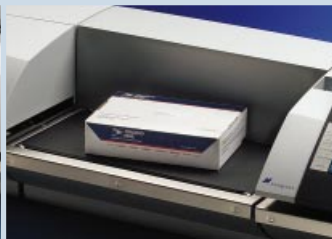

Under the sleek lines and ergonomic styling of the Neopost IJ105 is a high-performance mailing system that will take the efficiency of any mail center to the next level. As the most affordable high speed in-motion weighing system available today, IJ105 processes mixed mail with lightning speed and is engineered with the highest level of durability.

- Processes envelopes up to 217 letters per minute
- Speeds through mixed thickness up to 120 letters per minute in dynamic weighing mode
- Puts you in control with a touch-screen user interface
- Processes bulky, uneven mail up to 1/2" thick
- Provides unprecedented access with clam-shell design
- Features the latest in Digital Meter Technology, with full IBI compliance

Process mixed thickness and varying weights through the autofeed to weigh on the in-motion scale.

Utilize IJ105's dynamic scale in "static mode" for larger envelopes and packages.

Calculate rates of varying mail pieces with differential weighing. Just place the batch on the weigh platform and remove them one by one.

Access the interior of the IJ105 easily with its unique clamshell design. It opens wide for easy maintenance and cleaning.

Choose the IJ105 that's best for you.

Other high-end machines require users to conform to their terms. IJ105 places that control in the hands of the operator and allows users to weigh items on both the platform and/or the dynamic scale. Both scales offer unique benefits to your mailroom, and you can opt for your IJ105 to be equipped with either the scale or the platform—or choose both, depending on your requirements.

IJ105 with Dynamic Scale and WP15 weigh platform

The ultimate system for maximum performance, this system combines the benefits of in-motion weighing and static weighing to bring you the best in efficiency and flexibility.

IJ105 with Dynamic Scale

For those who regularly work with mixed envelope thicknesses and weights, the remarkably efficient in-motion weighing system gets the job done and out the door in no time. For the occasional small package, this system works in static mode as well.

IJ105 with WP15 Weigh Platform

Users who see more packages than mixed mail will love the first-rate accuracy of the weigh platform. Of course, with its differential weight capabilities, even mixed mail can be processed with ease.

IJ105 Specifications:

- Envelope processing speed: up to 217 letters per minute (up to 13,000 per hour)
- Mixed weight, in-motion processing speed: up to 120 letters per minute (up to 7200 per hour)
- Maximum thickness: up to 1/2"
- User-programmable function keys: 6
- Customizable advertising messages: 10
- Standard advertising messages: 8
- Accounting departments: 300 std. with upgrade option
- Weigh Platform Capacities: 15, 30 or 100lbs.
- In-motion capacity: 1lb.
- In-motion "static" capacity: 10lbs.

A Great Company

Founded more than 70 years ago, The Neopost Group is the fastest-growing provider of mailing, addressing, logistics and document handling products in the world. Neopost is the only company to have a major presence in the five largest global markets, and invests more of its resources into R&D than any of its competitors.

Neopost innovation means quality and performance. Every Neopost product combines the latest in technology with time-tested reliability. The result: Businesses that run more efficiently.
