the technology required tomorrow

*Digital Inkjet Postage
Meter & Scale*

*Get maximum
efficiency at a
minimum price
with this postage
powerhouse.*

- Intelligent design ensures easy operation
- Download postage refills via an internal modem — no more time-consuming trips to the post office
- Works twice as fast as the nearest competitor
- Integrated scale weighs mail and sets postage amounts automatically

 **neopost**

With the right postage meter, your mail means business

The new IJ25 from Neopost is a powerhouse postage meter offering advanced features at a very low cost. Using Hewlett-Packard inkjet technology, the IJ25 prints a digital IBIP indicia which makes your mail look more professional. And, metered mail can actually reduce your mail's delivery time.

We know you want to control costs, so when you place a letter or small package on the integrated scale the IJ25 will automatically set the correct postage amount. You'll save up to 20% in postage costs with this easy one-step operation.

The IJ25 lets you refill postage without ever leaving home. Just attach a phone line to the IJ25, enter in the amount you need, and follow the on-screen prompts. The IJ25's internal modem dials out and downloads the postage from a No-Deposit Postage-on Call® account.

With built-in security features, error warnings, and speed twice that of the closest competitor, the IJ25 is the obvious choice for small businesses. State-of-the-art IBIP technology ensures this meter will meet your mail management needs and rigid USPS standards today, tomorrow, and well into the future.

Save time. Save money. Save hassles. Make the move to professionally metered mail with the IJ25 — only from Neopost.

The IJ25 has the features you want	
Feature	Description
Automatic Date Changes	The meter updates itself to the correct date every day, eliminating mail posted with an incorrect date.
Internal Modem	Allows you to download postage over your phone line so you never have to make another trip to the post office to refill your meter.
Inkjet Printing	Digital inkjet printing offers crisp, clear printing and gives your mail a more professional look. Its digital technology makes every meter stamp unique, preventing fraudulent use and exceeding the most stringent security requirements of the USPS.
Cartridge Life of 2500 Impressions	Typical users only need to replace the ink cartridge about once every 6 months.
20 Letters per Minute	Twice as fast as its competitors, the IJ25 prints great-looking indicia in a flash.
Integrated 4 Pound Scale	IJ25 has the most common postal rates integrated into the meter. Just place your mail on the scale and the meter automatically sets the precise postage, ensuring you don't pay more than you have to.
8 Standard Slogans	8 commonly used mail rate descriptions and slogans help make your mail look more professional.
2 Custom Slogans	You can have your logo, logotype, or other custom image scanned and loaded into the meter so even your postage promotes your business.
Maximum Envelope Thickness up to 3/8"	The IJ25 directly imprints envelopes containing brochures, catalogs and multiple page mailings with ease. For items that are too thick, the meter prints on a "sure stick" postage label.
Low Postage & High Value Warning	You configure a set limit to warn when it's time to refill the meter so you never run out of postage at crucial times. Also, a high value warning can be set to prevent overpaying of postage.
Easy Postage Rate Changes	Software for rate changes can be easily loaded in the meter using "Smart Card" technology.

The IJ25 uses Hewlett-Packard inkjet technology that allows you to print a number of standard and custom slogans.

The Neopost Advantage

As one of the world's largest manufacturers of mailing equipment, nobody knows what's important to your business better than Neopost. We combine the latest technology, time-tested reliability, and a desire to help your business run better into every product we manufacture. You can trust our quality and performance.
