Digitally **enhancing**
your mailroom

neopost IJ75

User friendly, efficient,
and reliable

The New Standard in Mailroom Operation

Power, productivity and control: all essential features of a mailing system in today's high-demand mailing operations. But most mailroom managers agree that the single most important benefit is error-proof, reliable operation.

Now, with Neopost's IJ75 Digital Mailing System, you can have it all! The IJ75 sets a new standard in mailroom operation, providing the speed, productivity and reliability needed to meet your mailing requirements.

All the Benefits of Advanced Technology

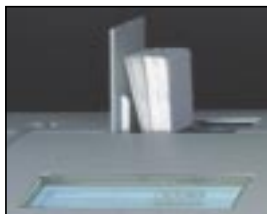

The IJ75 is the most advanced mailing system available for mailrooms, offering a wealth of sophisticated features – previously found only in expensive, high-volume equipment – for a fraction of the cost. Neopost's digital inkjet technology produces photo quality printing, generating the highest image clarity in its class. This feature also makes it ideal for reproducing advertising slogans or urgent messages directly on your mail pieces.

Because inkjet technology requires no contact with the surface, the IJ75 can accommodate uneven surfaces and still generate clean, crisp printing. This technique also results in whisper quiet operation compared to traditional machines that use ink stamping.

Reliable Beyond a Fault

Test after test, the IJ75 stands up to the most rigorous usage, maintaining high productivity and accuracy – thanks to its superior design. The combination of digital inkjet printing, a revolutionary new transport system that offers automatic thickness adjustment, and a wide feed platform ensures reliable processing of more envelopes than ever before. Thick, wide or poorly stuffed envelopes are processed flawlessly to virtually eliminate problems and improve productivity.

Neopost SureStick™ labels are easily processed in the high capacity, automatic label dispenser.

The IJ75 processes envelopes up to 5/8" thick – even the more difficult portrait style flats.

Up to ten preset memory keys prevent errors and save time for recurring mailings.

A Welcome Addition to Your Mailroom Environment

The IJ75 offers many of the same features available in most modern office equipment – a bright LCD display, whisper quiet and simple operation, and a sleek modern design – making it both ergonomically and aesthetically pleasing. Operation and maintenance is fast, clean and simple. Users simply weigh the mailing piece – to which the correct postage is automatically applied

– then load it into the envelope feeder and press “Start” to process a single piece or a batch. Frequently performed tasks can be easily pre-programmed so any user can select a preset instruction with one touch.

Better Technology for Better Productivity

The IJ75 was built for simplicity, yet offers a host of advanced functionalities to maximize productivity and streamline your mailing operation.

Boost Your Performance

Speed: Advanced automation and a fully automatic feeding system processes mail at 180 letters per minute.

Quality: Digital inkjet technology delivers a crisp, clear, ultra-high quality imprint.

Reliability: Transport system enhancements provide a consistent paper path and virtually jam-free processing of your mail.

Ease of Use: Mailroom staff can expertly manage your mailing needs in no time. No experience necessary, no extensive training.

Durability: Consistent, reliable performance.

Flexibility: A wide-feed platform and digital printing system processes virtually any envelope size – including thick and uneven – reducing the need for labels.

Integrated Mail Accounting: Tracks costs for up to 200 departments.

Simplicity Through Automation

→ Automatic Date Advance prevents costly rejected mail.

→ Automatic Thickness Adjustment – up to 5/8” thick – accommodates a multitude of envelope sizes.

→ Postage-On-Call® with Direct Connect adds postage at the push of a button.

→ Fast-Scale Interfacing sets the meter and automatically prints the label.

→ User-Programmable Job Keys provide instant access to up to ten preset memory keys, allowing you to customize your mailing operations.

The Hewlett-Packard "Click n' Snap™" ink cartridge makes re-inking a snap, with no mess.

An optional printer can be added to print 8.5"x11" postage accounting reports.

Optional 5, 10, 30 and 70 pound scales interface with the IJ75 for weighing items and automatically setting the correct postage.

Download Postage for Instant Meter Refills

Now you can refill postage quickly and easily via a direct modem connection. Just attach a phone line to the IJ75, enter the amount you need, and follow the on-screen prompts. The IJ75's internal modem dials out and downloads the postage from a No Deposit Postage-On-Call® account.

Put the Neopost Advantage to Work for You

As one of the world's largest manufacturers of mailing equipment, Neopost knows what's important to your business. Every product we make combines the latest technology, time-tested reliability, and a desire to help your business run more effectively into every product we make. You can trust our quality and performance!

A Great Company

If your system isn't reliable, it isn't from Neopost. We set the standards for quality and durability. We're also the company that continually produces the most advanced mailing and shipping products available. With our Price Protection Program, we guarantee that your costs will not increase over the life of your contract. Equipment and service can be combined in one monthly or quarterly payment, and can even be paid automatically through our Neopost Automated Payment Plan.
