# IJ85

## Fast and reliable productivity

Engineered to withstand the demands of today's high-volume mailroom environment, the IJ85 is the most advanced mailing system available. With remarkable speed, reliability and a wealth of features previously found only in more expensive high-volume equipment, the IJ85 takes productivity to a new level — for a fraction of the cost.

The IJ85 is equipped with technologically advanced features, like a digital inkjet printing system and a revolutionary new transport system, that virtually eliminate errors and improve productivity. By using Neopost's digital inkjet technology, the IJ85 quietly prints photo-quality messages and images of the highest clarity. It also reproduces advertising slogans or urgent messages directly on mail pieces. And because inkjet technology requires no contact with the surface, the IJ85 can generate clean, crisp printing on even or uneven surfaces.

The IJ85 also features automatic thickness adjustment, and a wide-feed platform, so it can reliably process more pieces. Even thick, wide or poorly stuffed envelopes are processed flawlessly. Test after test, it performs under the most rigorous conditions, maintaining high productivity and accuracy. Of course, the IJ85 also offers many of the same features available in most modern office equipment—a back-lit LCD display, quiet operation, and a sleek modern design—making it both ergonomically and aesthetically pleasing.

Operation and maintenance is fast, clean, and simple. Users simply weigh the mailing piece, to which the correct postage is automatically applied, then load it into the envelope feeder and press "Start" to process a single piece or a batch. Frequently performed tasks can be easily pre-programmed so any user can select a preset instruction with one touch.

With better technology for better productivity, Neopost's IJ85 was built for performance, offering a host of advanced features that maximize productivity and streamline the mailing operation of any business.

### **Never compensate for envelope thickness again!**

With Automatic Thickness Adjustment the IJ85 makes manually-adjusting meters obsolete, and processes mail up to 5/8" thick—even the more difficult portrait-style flats.

*The robust, fully automated IJ85 offers the ultimate in high-volume productivity. This high-quality mailing powerhouse effortlessly processes up to 210 pieces per minute, establishing it at the top of its class.*

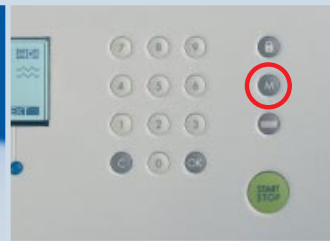

- Processes up to 210 pieces per minute
- Prints high-resolution indicias with digital inkjet technology
- Advances date automatically to avoid expensive, post-dated mail
- Eliminates feeding complications with Automatic Thickness Adjustment
- Adds postage with touch-button ease
- Interfaces with postage scales up to 70 lbs.
- Accesses common jobs with ten user-defined presets
- Handles virtually any size of envelope with precision and ease

Re-ink your IJ85 with Neopost's exclusive cartridges. Unlike the messy re-inking process of other meters, these cartridges pop in and out with ease and utilize inkjet technology from Hewlett-Packard.

Post thicker mailings and packages using Neopost's SureStick™ labels. This high capacity, built-in dispenser prints labels automatically.

Prevent errors and save time by pre-programming up to ten common jobs. Then, with the touch of a button, your IJ85 is ready to use!

Print high-resolution marketing or public service messages on your mail, and leave a professional impression with all your clients. Customized slogans and images are loaded using Neopost SmartCard® technology.

Neopost products integrate with, and compliment, one another to streamline your mailing process from start to finish. Shown above is the IJ85 working in-line with a Neopost Folder/Inserter.

### mailing

postage meters/ mailing machines/ addressing systems  
Your business deserves the speed and reliability of Neopost Mailing Systems. Our innovative engineering brings the most advanced features into all our machines, enabling your business to enjoy enhanced productivity.

### logistics

desktop systems/client-server systems/web-enabled systems  
The power to lower your shipping costs is at your fingertips with Neopost Logistics Systems. With instant rate-shopping and online tracking information, our systems help your packages get where they need to go, on time, for the most economical rate.

### document handling

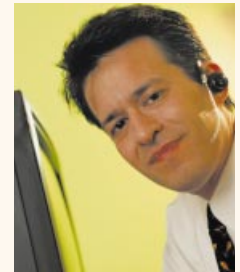

folding/inserting systems-incoming letter opening/extracting equipment  
Cutting your labor costs and reducing the turnaround time of your receivables is easy with Neopost Document Handling Systems. Our products feature the precision, ease of use, and reliability your mail requires.

A Great Company

Founded more than 70 years ago, the Neopost Group is the fastest-growing provider of mailing, addressing, shipping and document handling products in the world. Neopost is the only company to have a major presence in the five largest global markets, and the company invests more of its resources into R&D than any of its competitors.

Neopost innovation means quality and performance. Every Neopost product combines the latest in technology with time-tested reliability. The result: businesses that run more efficiently.
