

USPS Delivery Confirmation

The Confidence of Confirmation

Everything your company sends out is important. And frequently, it is important for you to know the delivery status of what you send. Now Neopost and the U.S. Postal Service make this easy and affordable with our Neopost Parcel Shipping Automation or Mail Accounting Management Systems.

Neopost parcel shipping and mail accounting management systems are certified with the U.S. Postal Service to support Electronic Delivery Confirmation with Signature Capture. The Delivery Confirmation service provides mailers with up-to-date information on the delivery status of your Priority Mail™, Express Mail®, and Standard Mail B. Via our Neopost software solutions you can easily access delivery confirmation information electronically 24 hours per day - 7 days per week. Now the U.S. Postal Service can also obtain an actual signature upon delivery of your parcel for proof of delivery. You get the peace of mind you expect with commercial carriers but with the huge cost savings of using USPS services. The U.S. Postal Service is the only carrier which delivers to every zip code in the United States including P.O. Boxes. And when your shipment is delivered to a residential or rural address, unlike other carriers the USPS never charges a premium for delivering it there.

To learn more about how a Neopost parcel shipping or mail accounting management system with Electronic USPS Delivery Confirmation can help maximize your productivity please contact your local Neopost Dealer or Sales Representative. Or, call us toll free at 1-888-Neopost (636-7678), and ask for department MB09. You can also visit us on the Web at www.neopostinc.com.

- USPS Electronic Delivery Confirmation w/Signature Capture Compliant Module
- Dedicated analog telephone line
- Compatible thermal label printer

Neopost software are also USPS "MAC Certified" for mail manifesting.

Delivery Confirmation Compliant Shipping Label

HOW DOES IT WORK?

First, you must obtain authorization from the USPS to mail your packages using the electronic Delivery Confirmation service. Second, install a Neopost system with the Delivery Confirmation software enabled. As each parcel is processed the Neopost system creates an electronic file with identification number for each transaction, prints a shipping label with the unique ID number, and transmits the file to the USPS Delivery Confirmation Parcel Tracking System (PTS). The dedicated USPS delivery and tracking system ensures proof of your package's delivery status within the U.S. Postal Service transportation system. Finally, the Neopost software will provide you with an electronic record of the detailed delivery status of each parcel from the PTS network in a customizable reporting format. It's a powerful tool, yet simple to use. Within 24 to 72 hours after mailing your parcel, you can confirm the delivery status with one of three easy options:

- **Call 1-800-222-1811.**
- **Visit the USPS web site at www.usps.com/bmc/**
- **Use your Neopost system.**

When you have time-sensitive packages or letters, and you're sensitive to high costs and premiums, Neopost electronic Delivery Confirmation certified software is the worry-free way to process them. Contact Neopost today at 1-888-NEOPOST for information.

New USPS rates, services, and documentation requirements will be incorporated as they become available into the Neopost software systems.

If you have a specific requirement that you do not see listed above, contact Neopost for availability.
